

AT A GLANCE

Accelerating Salesforce

www.aryaka.com/salesforce

Salesforce is at the heart of every major organization. It affects every area from ERP, Marketing, Payroll, Support Ticket Handling, O365, and more.

While Salesforce supports a wide range of mission-critical business activities, its performance comes with a set of challenges.

If the distance between the Salesforce cloud and the end user is more than a few hundred miles (or even 20 milliseconds or higher in network speed), application performance suffers due to the inefficiencies of the public Internet. These issues are fairly common. The public Internet is plagued with high latency, congestion, packet loss and jitter – all of which kill application performance.

As a result, Salesforce implementation may be accompanied by a dip in productivity or an increase in the number of end user complaints. Furthermore, alternative technologies like static CDN, simply weren't designed for improving the performance of dynamic SaaS applications.

Aryaka's Salesforce Acceleration Solution

Hundreds of global enterprises rely on Aryaka to:

- Improve sales productivity and business execution
- Deliver a faster and seamless user experience worldwide
- Increase adoption rates across the organization

Aryaka enhances Salesforce performance by:

- Connecting to the Salesforce cloud through a globally distributed network instead of the public internet
- Using WAN Optimization to accelerate access to the cloud

As a result, they can enjoy the following benefits:

- Faster and more reliable access to the Salesforce cloud
- Better productivity and collaboration
- Greater and more effective use of CRM capabilities

aryaka

Benefits

Up to 55% Faster Performance for Salesforce

Speed up Salesforce globally for improved user experience and increased productivity.

Up to 95% Data and Bandwidth Reduction

Benefit from compression, data deduplication, and TCP optimization for faster Salesforce performance, and reduced Total Cost of Ownership (TCO) of the network.

Fast Global Network Deployment

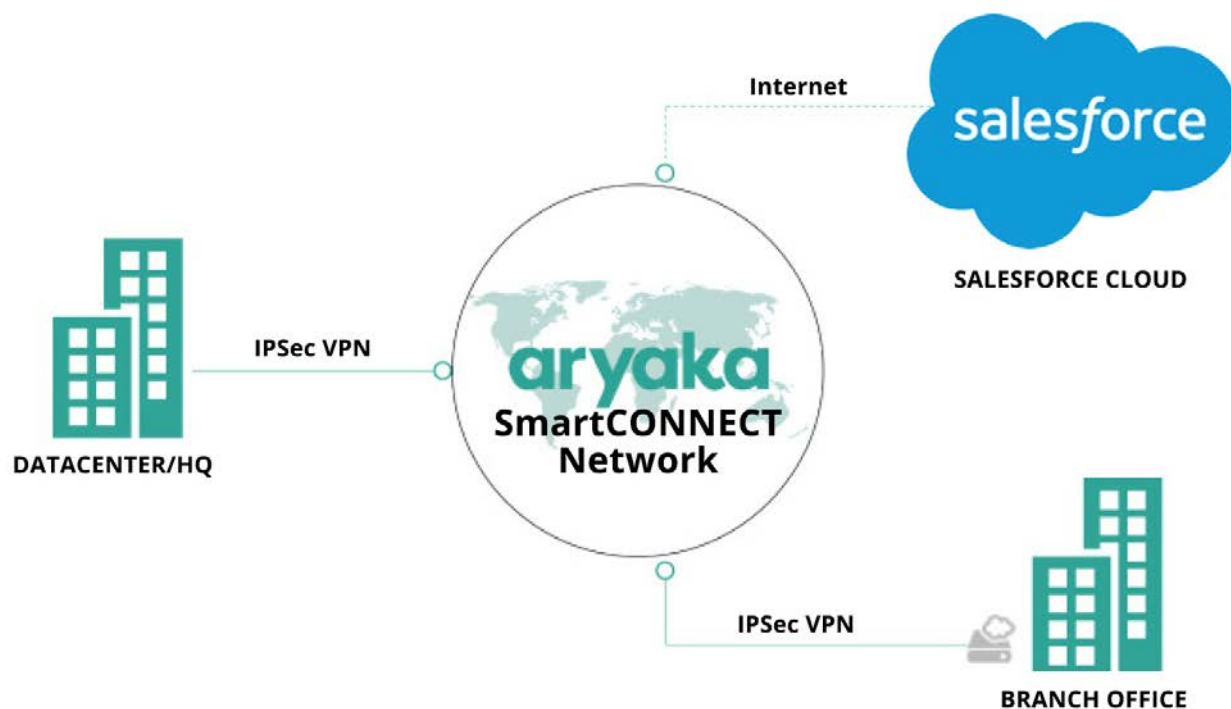

Connect end users to Salesforce within days, from anywhere in the world.

End-to-End Network and Application Visibility

Gain an end-to-end, transparent view into the performance of your network and applications.

Aryaka's Salesforce acceleration solution bypasses the public internet with an enterprise-grade global network, which provides enterprises with secure, reliable, and accelerated access to Salesforce. With built-in WAN Optimization, Aryaka's solution can deliver up to 55% faster Salesforce performance to global end-users.

About Aryaka Networks

Aryaka's global SD-WAN is the #1 MPLS replacement for global enterprises. Aryaka delivers a global enterprise connectivity solution for datacenters, branch offices and remote/mobile employees with significantly better performance for on-premises and cloud applications – voice, video and data. It is delivered as a service eliminating the need for complicated, costly and time consuming WAN construction and maintenance. Unlike MPLS, Aryaka global SD-WAN can be deployed anywhere in the world within days without requiring additional hardware or resources.
