

Aryaka Global SD-WAN

Aryaka disrupts telcos by providing the #1 MPLS replacement solution to enterprises. Aryaka’s global SD-WAN delivers a significantly better performance for cloud and on-premises applications — voice, video and data — for enterprise datacenters, branch offices and remote/mobile employees anywhere in the world.

Unlike MPLS that takes months to deploy, Aryaka’s Global SD-WAN can be deployed within days. It is delivered as a service, so IT organizations can consume global networking services the way they would consume SaaS applications like Salesforce and infrastructure-as-service like AWS and Azure.

| #1 MPLS Alternative | Application Acceleration | Consume vs. Construct |
|---|---|---|
| <ul style="list-style-type: none"> Directly connect to the cloud Deploy in hours or days Gain significantly better performance and cost savings compared to MPLS | <ul style="list-style-type: none"> Provide fast connectivity for business-critical, on-premises and cloud applications globally Improve application performance for datacenters, branch offices and remote/mobile employees | <ul style="list-style-type: none"> Scale the enterprise with a fully-managed global service Eliminate capital expenses and operational costs Benefit from 24/7 CCIE-level customer support |
