

International Day of Girls and Women in Science

In cutting edge fields such as artificial intelligence

22%

1 in 5

professionals is a woman.

but only **28%**

of engineering graduates are women

40%

of graduates in computer science and informatics but

Only **25%** in the job market

Less than **30%**

scientific research and development positions

Men in tech got higher pay

59% of the time

Female researchers tend to have shorter, less well-paid careers and are often passed over for promotion

Learn about inspiring women in tech and science – Read about the contributions of female leaders in these fields, including pioneers like Grace Hopper, the first woman to develop computer software, Radia Perlman, known as the “Mother of the Internet,” and Ada Lovelace, creator of the first computer program.

- ✓ Support female-led tech and science companies
- ✓ Mentor the next generation
- ✓ Advocate for gender equality in the workplace

Our strategy is to support, empower, and grow.
