

SD-WAN for Microsoft Azure

Simplify Multi-Cloud Connectivity and Improve Application Performance

"Our colleagues around the world were able to load their files to SharePoint three times faster, we experienced a 200x reduction in the time to open 10MB SharePoint files, and saw three times improvement in the time taken to upload 10MB files to OneDrive."

Alan Crawford, CIO
City & Guilds Group

Aryaka's SmartCONNECT SD-WAN as a Service operates over a global private network with 30 Points of Presence (POPs) co-located in the same IaaS data centers used by Azure, and there is **NO MPLS** involved. SmartCONNECT gives you a choice in how you connect to your VNets. You can elect to utilize ExpressRoute or go with IPsec VPN. Either way, this is completely handled by Aryaka.

Aryaka can help your enterprise easily connect your users in the following ways:

- **Enterprise to Cloud** – Access to Azure resources for users at headquarters, branch offices, and remote locations through a software-defined, application optimized global private network with a choice of ExpressRoute or IP VPN options
- **Cloud to Cloud** – Enterprise-wide access to multiple ExpressRoute VNets
- **Multi-Cloud** – Enterprise-wide access to applications hosted simultaneously on Azure and other IaaS, PaaS, or SaaS platforms

In addition, Aryaka provides multi-layered security, including virtual firewall capabilities within Azure from partner Palo Alto Networks. Only Aryaka makes connecting your multiple clouds this easy.

Connectivity	Aryaka Software-Defined Global Private Network	SD-WAN Competitors
Azure ExpressRoute	Yes	Yes via MPLS
Azure VNet	Yes	Yes via Internet
Azure VNet (Out of Region)	Yes	No or requires peering
Azure VNet (BYO Firewall)	Yes	No
Azure to Other IaaS	Yes	Only with cloud fabric, multiple direct connections
Azure to SaaS	Yes	Only with cloud fabric, multiple direct connections
