# aryaka

SmartCONNECT Works Best for:

- **Application Acceleration**
  Improve performance for all mission and business critical applications: on-premises, cloud, SaaS.

- **Multi-Cloud Connectivity**
  Connect directly to and between all your private, public, and hybrid clouds easily: AWS, Azure, Google Cloud, Oracle, O365, Salesforce, and more

- **Enhanced Real-Time Communications**
  Provide a better experience for collaboration services from anywhere in the world.

- **Secure SD-WAN**
  Protect the expanding attack surface at the edge and cloud

- **MPLS Alternative**
  Augment or replace MPLS connections for better flexibility, performance, security, and cost savings

- **Fully Managed Global WAN**
  Eliminate network management hassles with a single solution and save up significant costs

Aryaka SmartCONNECT
SD-WAN as a Service for Global Enterprises

Aryaka® SmartCONNECT is a turnkey, fully-managed global SD-WAN service that delivers predictable performance for any application, anywhere in the world:
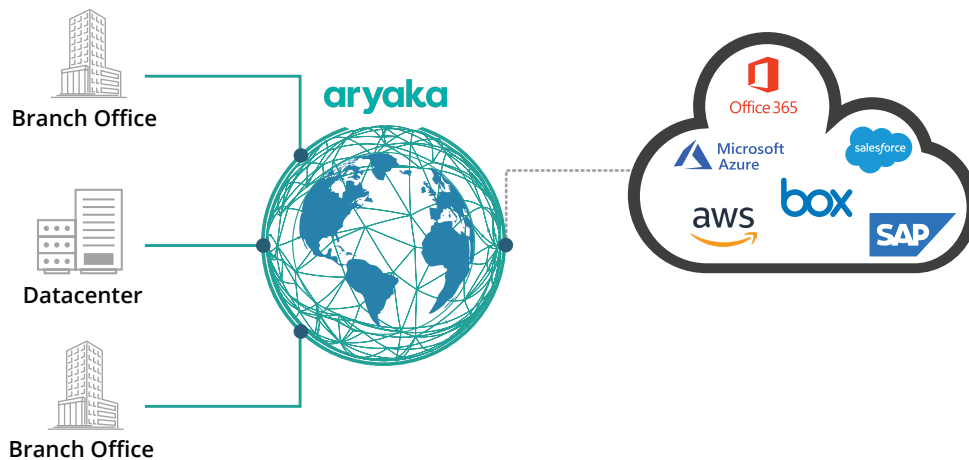

- Deploys in as fast as an hour
- Leverages a global, software-defined Layer 2 private network with WAN Optimization, using NO MPLS
- Delivers performance acceleration for business-critical applications
- Provides connectivity to and between multiple cloud platforms
- Offers 99.99% end-to-end reliability SLA
- Leverages public Internet connectivity for non-critical priority traffic

Office 365 — **40x** faster on **Aryaka**

box — **7x** faster on **Aryaka**

Microsoft Azure — **8X** faster on **Aryaka**

SAP — **10x** faster on **Aryaka**

salesforce — **55%** faster on **Aryaka**

aws — **8X** faster on **Aryaka**

ORACLE — **8X** faster on **Aryaka**

AUTODESK AUTOCAD LT® — **5x** faster on **Aryaka**

Aryaka SmartCONNECT:
A global private network accelerating application performance with 30+ PoPs around the world

Global Support Services

SmartCONNECT is backed by a highly rated CCIE-level support team that rapidly responds to service disruptions 24x7x365, ensuring reliable connectivity for all business locations.

Aryaka SmartCONNECT Delivers:

- **Global Private Network**
  Leverages Aryaka's global Layer 2 network for fast, reliable, and predictable connectivity.

- **Application Acceleration**
  Improves performance of datacenter and cloud applications with TCP and WAN Optimization capabilities built into the network.

- **SD-WAN Technology**
  Simplifies the WAN, improves traffic flows, and ensures QoS, configuration accuracy, resilience, failover, and scalability.

- **End-To-End Visibility and Monitoring**
  Aryaka provides 24x7x365 monitoring of links, packet loss, and latency to proactively address network concerns. Aryaka can also provide link procurement, planning and activation of tier-1 broadband connectivity regionally and worldwide.

- **Multi-Cloud Connectivity**
  Access cloud applications seamlessly with direct connectivity to and between IaaS and SaaS platforms.

- **Fully Managed Network-as-a-Service**
  Delivers 24X7 expert network monitoring and management to ensure performance and quality link connections.

- **Network Visibility Portal**
  Provides a real-time 360-degree view of all network traffic and applications across the entire WAN.

- **Cost-efficient Connectivity**
  HybridWAN (site-to-site) provides the ability to leverage cost-efficient public Internet connectivity for non-critical applications.
